

Big Disease Problems, Big Markets

- Sex infection is at an all-time high.
- Respiratory infection is growing rapidly and COVID is still with us.
- There is a \$150 billion infectious disease pharmaceutical market world-wide.
- Age related disease is growing rapidly.
- There is a \$150 billion pharmaceutical market for inflammatory age-related disease world-wide.
- There is a potential market for healthy aging and longevity around £500 billion world-wide.

The Ezrin Peptide Solution

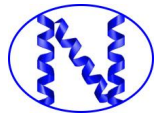

- Ezrin peptides:
- SAFE.
- IMPROVE natural CCL5 immune amplification.
- SUPPRESS inflammatory cytokines.
- Ezrin peptides can treat ANY infection (Viral, Bacterial, Fungal or Protozoan).
- Stop sex infections & respiratory infections
- Stop age-related inflammatory diseases
- Induce healthy aging
- Products are protected by patents world-wide.

Newal R&D

Chance of a BIG WIN

- Ezrin peptides can cure Inflammatory Spine Disease (AS).
- Ezrin peptides can cure Inflammatory Bowel Disease (IBD).
- Both these inflammatory diseases are due to weak FOXO3a activity.
- A biological program controls aging and can be modulated.
- FOXO3a activation leads to life-span extension.
- Ezrin peptides may induce cell signals that both activate FOXO3a, improve healthy aging and extend life span.
- GSK paid \$720 million to buy Sirtris inc. to get into the longevity medicine field.
- Investors in NewalR&D have a chance of a \$ billion+ exit.

NewalR&D Limited

Ezrin Peptide Pharmaceuticals

Raising £5 million
Private Placing of Ordinary Shares
Pre-Money Value £9 million

Targeted IPO Value of £100+ million
Targeted Acquisition Value of £1000+ million
